

Disabilities & Special Educational Needs Policy

You must inform us of any health problems, disability or special needs before making an application. This will enable us to give you the best support that we can. All special needs will be treated case by case and through discussions with the academy management. The academy reserves the right to assess the needs of each individual student and to decide if the academy is suitably able to meet those needs. We may refuse your application or cancel your course if you fail to inform us.

Wheelchair Access

There is wheelchair access to the Academy and disabled toilet facilities. This is not necessarily the case at the home stay or residence accommodation. Please discuss with us, before you make your application, if you have questions about support for disability and special needs.

Other Special Needs

The Academy tries to accommodate students with special needs as much as we can. We will try to accommodate such needs by being vigilant and ready to get help if required. Some conditions may affect students' ability to study. Please discuss with your doctor if you are unsure that your needs will affect your ability to study.
